

**Dear “Medical & Legal Aspects of Pain Management” participants and interested participants:**

Due to the tremendous response we have received from all participants, we have found it necessary to change our location from Francis Tuttle Vo-Tech on Reno to the New Location Meridian Convention Center at 737 S. Meridian Ave., Oklahoma City, OK 73108.

We felt it very important for as many as possible be able to attend this very important event. Please see attached a copy of the New Flyer and a Map which provides instructions to this new location.

We appreciate your understanding and know that you will truly enjoy this outstanding upcoming event. We look forward to seeing each of you there. If you have any questions please contact Sandy Deeba at 405-601-9571 or [deeba@okmed.org](mailto:deeba@okmed.org)

### ***Who Should Attend and Why?***

Physicians in all specialties, Physician Assistants, Pharmacists, and Nurses in medical offices, clinics, hospitals, palliative care and home health, who need or wish to increase their medical and legal knowledge of pain management and enhance their ability to effectively prescribe, administer and control opiate medications without the potential for abuse.

## Participant Learning Objectives

---

After attending this course, participants will be able to:

- Understand the Federal and State law regarding opiates, the standards for opiate use;
- Develop a Clinic Policy for managing pain patients and opiate prescribing;
- Employ interviewing techniques relating to the diagnosis and management of substance abuse in general and prescription drug abusers in particular;
- Select patients who are appropriate candidates for opioid management of chronic pain in keeping with established guidelines;
- Define risk factors for potential misuse or abuse of prescribed opioid medications, recognize the importance of consistent screening for risk prior to prescribing, and outline a time efficient method of screening for risk;
- Follow an evidence-based protocol for starting patients on opioid analgesic therapy, including issues specific to safely initiating and titrating opiates;
- Recognize aberrant drug taking behaviors related to opioid misuse or abuse, and be able to distinguish unintentional misuse and “pseudoaddiction” or “chemical coping” from deliberate misuse, abuse and diversion;
- Outline an effective approach to clarify and intervene appropriately with aberrant drug-taking behaviors, including referral to specialized addiction treatment programs when indicated; and
- Discuss beliefs, stereotypes, and attitudes about controlled substance prescribing, controlled drug abusers and chemical dependency, and consider the therapeutic implications of treatments based upon these beliefs.
